

Butlins, Bognor Regis

Client: Rank Leisure Year of Completion: 1998

Architect/Designer: S & P Architects

Founded in 1936, Butlins seaside holiday resorts are a British institution, therefore, Architen Landrell was thrilled to win the contract to design, manufacture and install the Skyline Pavilions for the three remaining sites as the resort underwent renovation.

In 1998, as part of the 75 million redevelopment scheme undertaken by Rank Leisure, Architen Landrell was contracted to design, manufacture and install the Skyline Pavilion at the seaside Butlins resort in Bognor Regis.

This huge canopy, the biggest of the three installed by Architen Landrell, forms the hub of the site enclosing nine thousand square metres between buildings to create year round, weather protected restaurants and entertainment areas.

A defining project for both Architen Landrell and Butlins, the skyline pavilions proved a real challenge for all involved. Manufactured in PVC coated polyester with integral linings in the factory in Chepstow, all three structures then had to be installed simultaneously within one month during the refurbishment of the sites, ready to open in time for the peak summer season.

Location:

Bognor Regis, UK

Category:

Exterior

Market Sector:

Entertainment
Sports and Leisure
Events

Scope Of Works:

Design
Engineering
Manufacture
Project Management
Install
Steelwork

Fabric Type:

PVC - Fabric

Design Style:

Conic
Ridge and Valley

Function:

Weather Protection
Sculptural/Decorative
Roof
