

Clifford Chance Headquarters

Client: Clifford Chance Year of Completion: 2006

Architect/Designer: Architen Landrell Main Contractor/Customer: Canary Wharf Contractors

Architen Landrell was approached by Canary Wharf Contractors Ltd to design, manufacture and install a series of printed glazed facade screens to hide permanently an electricity sub-station located outside the Clifford Chance headquarters in London's docklands that was visible through the full-height glazing at one end of its impressive lobby.

The main challenge with this project was to develop a bespoke clamping system that enabled the support and tensioning bracketry to attach to the curtain walling mullions without any drilling and without leaving any marks. The PVC/glass mesh fabric was printed with a deliberately washed-out monochrome parkland scene to suggest foliage behind, and successfully masks the actual industrial reality within the enclosure. The screens have the added benefit of providing solar glare control to the fully-glazed lobby.

Location:

Canary Wharf, London, UK

Category:

Interior

Market Sector:

Offices

Scope Of Works:

Design
Engineering
Manufacture
Project Management
Install

Fabric Type:

PVC Glass Mesh - Natte

Design Style:

Screens

Function:

Light Control
Solar shading
Screening
