

Omnifone Offices

Client: Omnifone UK Year of Completion: 2008

Having worked closely with Lifschutz Davidon Sandilands to create some sun screens at their office, we were approached by Omnifone (tenants of LDS) to create some screens to carry out a similar purpose.

As with the previous installation, Omnifone had a problem with the sun shining through the sky lights and allowing glare onto the desks below. After surveying the space, we proposed a very similar solution to the panels previously supplied the installation of a series of rectangular panels into the skylights in order to reduce the solar transmittance.

Using E-Screen mesh to fabricate the panels allowed some light to be transmitted through into the space below but ensured significantly reduced glare.

Location:
London, UK

Category:
Interior

Market Sector:
Offices

Scope Of Works:
Design
Manufacture
Project Management
Install

Fabric Type:
PVC Glass Mesh - E-Screen

Design Style:
Sails

Function:
Solar shading
