

Royal Festival Hall

Client: The South Bank Centre Year of Completion: 2003

Architect/Designer: Allies and Morrison Main Contractor/Customer: Royal Festival Hall

A part of a major refurbishment at the Royal Festival Hall on London's South Bank, the main concert hall has undergone a complete re-evaluation of its acoustic performance, resulting in the requirement for an acoustically-engineered update of the over-stage reflectors.

Architen Landrell was commissioned to design, manufacture and install a lightweight fabric deployable acoustic reflector to be mounted above the main stage in the concert hall at the Royal Festival Hall. We worked closely with American acousticians Kirkegaard Associates and with architects Allies and Morrison in developing a sculptural acoustic solution from a bespoke weave

Location:
London, UK

Category:
Interior

Market Sector:
Public Buildings
Entertainment
Events
Arts

Scope Of Works:
Design
Engineering
Research and Development
Manufacture
Project Management
Install

Fabric Type:
PVC Glass Mesh - Other

Design Style:
Barrel Vault

Function:
Acoustic
Sculptural/Decorative
Staging
Ceiling
