

## Streamstown Park Canopy

Client: LM Developments Year of Completion: 2009

Architect/Designer: Austen Associates Main Contractor/Customer: LM Developments

In a high class residential area of Dublin, its not just the houses which have to be top of the range! The external environment of Streamstown was given a lot of thought by property company LM Developments and they approached Architen Landrell to design, manufacture and install a tensile fabric canopy.

After an initial design concept was issued by the architect, Architen Landrell were tasked with progressing the scheme into a workable, aesthetically pleasing structure. We worked alongside a local steelwork provider to design the interface between steelwork and fabric which ensured a true fit.

Once designed, we manufactured the fabric covering in our factory in Chepstow and shipped it out to Ireland for installation. As an overseas project there was little room for error in the manufacture and installation. We had to plan the project extremely carefully with a local specialist in order that when the site team went out to Ireland to install all went as intended.

**Location:**

Dublin, Ireland

**Category:**

Exterior

**Market Sector:**

Public Buildings

**Scope Of Works:**

Design  
Engineering  
Manufacture  
Project Management  
Install

**Fabric Type:**

PVC - Fabric

**Design Style:**

Conic

**Function:**

Weather Protection  
Sculptural/Decorative
